SUMMARY

Backend developer who builds secure REST APIs with C#, ASP.NET Core, PostgreSQL and Entity Framework Core. Spent six months as a backend intern at SolveStation Limited writing and testing APIs for web and mobile clients. Built role-based systems with JWT authentication, including a pharmacy inventory API and an academic collaboration platform. National Diploma in Computer Science, completed October 2026.

TECHNICAL SKILLS

Languages: C#, Python

Backend: ASP.NET Core (Web API, MVC), REST APIs, JWT Authentication, Role-Based Access Control (RBAC), OWASP Security Headers

Databases: PostgreSQL, SQL Server, Entity Framework Core

Tools: Git, GitHub, Swagger/OpenAPI, Postman, xUnit, Render

EXPERIENCE

Backend Developer Intern | SolveStation Limited **Sept 2025 – Feb 2026**

Lagos, Nigeria

- Built secure RESTful APIs in C# and ASP.NET Core for web and mobile clients, and wrote endpoint documentation to help new developers get started.
- Wrote unit and integration tests with xUnit that caught regression bugs before they reached staging.
- Improved database queries and backend workflows using Entity Framework Core.
- Agreed JSON API contracts with frontend developers early, which cut down integration errors.

Volunteer Video Editor and Camera Operator | Muslim Television Ahmadiyya **June 2023 – Present**

- Shoot and edit broadcast content for a TV channel, working to tight production schedules.

PROJECTS

LivestockLink *github.com/Ataud-dayyan/LivestockLink (dev branch)*

ASP.NET Core, PostgreSQL, EF Core, JWT

- Built the backend API for a B2B agricultural brokerage platform, handling relational data and transactions with PostgreSQL and EF Core.
- Secured endpoints with strict JWT bearer authentication and OWASP-recommended security headers, and tested for vulnerabilities with OWASP ZAP.

PharmInvMS - Pharmacy Inventory System *github.com/Ataud-dayyan/PharmInvMS*

ASP.NET Core 8, PostgreSQL, EF Core

- Built a Web API with JWT authentication and role-based access for four user roles: patients, doctors, pharmacists and admins.
- Implemented multi-drug prescriptions, automatic inventory deduction, atomic dispense transactions, and low-stock and 30-day expiry alerts.
- Designed the database code-first with EF Core, using GUID keys, and kept the frontend (HTML, CSS, JavaScript) separate from the API over JSON.

Campus Collab *github.com/Ataud-dayyan/CampusCollabFPI*

ASP.NET Core, C#, SQL Server, PostgreSQL

- Built a full-stack academic platform with separate student and lecturer roles, course creation and group management.
- Developed against SQL Server locally, then migrated the schema to PostgreSQL and deployed on Render.

EDUCATION AND CERTIFICATIONS

National Diploma, Computer Science — **Completed October 2026**
Federal Polytechnic Ilaro, Ogun State

Foundational C# Certification — **January 2026**
freeCodeCamp with Microsoft

Full-Stack Programming Certificate (.NET) — **Sept 2024 – Sept 2025**
Mirza Ghulam Qadir Shaheed, Lagos
